Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-34 and 36 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 21-33 and 36 is/are allowed.
- 6) ☐ Claim(s) 1,2,4-6,8-11,16 and 34 is/are rejected.

DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claims 1, 2, 4, 8-11, 16 and 34 is withdrawn in view of the newly discovered reference(s) to Canada. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Canada (5,974,690). Canada shows a blow dryer capable of being used for livestock having a blower housing 4 with an air inlet opening 2 and an air outlet opening (unnumbered), a blower motor within the housing and an air filter cartridge 1 removably mounted within a filter holding section as defined by the shape of the filter and the air inlet area 2 on a top surface of the housing. The filter 1 having a perimeter section and a filter section within the perimeter section.

Claims 8--11 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Sharples (D343,698). Sharples shows a blow dryer capable of being used on livestock comprising a substantially cylindrically shaped blower housing (fig. 1) with a handle and

having an air inlet opening (fig. 4) and an air outlet opening (fig. 3), at least one motor within the blower 40 housing and a nozzle shaped to gradually contract from a wide end attached to the blower housing and having a diameter approximately the same as the blower housing to 4 narrow end pointing away from the blower housing (figs. 5, 6). It is considered that the narrow end of the nozzle is capable of being an attaching section.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sharples in view of Canada. Sharples does not teach the use of a filter. Canada teaches the use of a filter. With respect to claim 16, to use the filter of Canada with the dryer of Sharples would have been obvious to one skilled in the art to protect the air inlet from clogging with particulates such as hair and dust.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 recites the limitation "the cylindrical blower housing" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

Claims 3, 7, 12-15 and 17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 5 and 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 21-33 and 36 are allowed.

Response to Arguments

Applicant's arguments with respect to claims 1-36 filed Dec. 13, 2005 have been considered but are moot in view of the new ground(s) of rejection. With respect to claims 9 and 34, the claims recite "for attaching a hose to the nozzle" which is a statement of intended use, as there is nothing in the reference to Sharples to preclude one from attaching a hose to the nozzle.

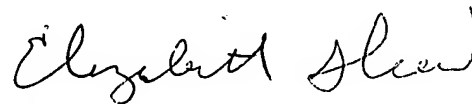

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth A. Shaw whose telephone number is 571-272-6908. The examiner can normally be reached on M-Th 10:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teri Luu can be reached on 571-272-7045. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
